

FAVOUR EZEH

TECHNICAL SKILLS

Languages: Javascript(Typescript), HTML/CSS, React, React Native, Flutter, C#, SQL(PostgreSQL, MongoDB)

Frameworks: React, Next.js, Node.js, .NET, Tailwind CSS, Cypress,

Developer Tools: Docker, RabbitMQ,Github Actions, MicroServices, AWS,

EXPERIENCE

Afripoint Group, Lagos, Nigeria / Remote | Frontend & Mobile Developer | March 2025 - Present

- Developed and deployed a live Nigeria Customs Verification Management System (CVMS) for VIN check verification
- Built responsive web frontend using React and TypeScript, ensuring type safety and maintainable codebase
- Developed Nigerian Customs mobile enforcement app using React Native for cross-platform deployment
- Implemented user-friendly verification workflows,cross-platform compatibility, improving customs processing efficiency for field officers
- Collaborated with backend teams to integrate VIN verification APIs and ensure seamless data flow

MartadHoldings, Nigeria / Hybrid Fullstack Software Engineer | August 2024 - November 2024

- Implemented RabbitMQ for inter-service communication, enhancing message reliability.
- Develop Compliance and Document Microservices, integrated them with gateways and other services
- Designed business logic using CQRS, EFCore, optimizing database operations.
- Wrote Unit tests and ensured end-points functionality, achieving 90% code coverage.
- Integrated Window Background Service to automate routine backend tasks.

Bud Pay Infrastructure Nigeria/Hybrid .Net Software Developer February 2023 - March 2024

- Worked with an agile team of software engineers developing web services
- Utilized ASP.NET Core Web Api pattern to build interactive web applications called Ticket-Ease Management System, with seamless front-end integration
- Developed, designed, coded, tested and debugged systems following OOP and SOLID principles
- Implemented and tested API endpoints to meet business requirements, as on-demand features, and performed various security checks

Allvotech Remote, Nigeria Software Engineer September 2022 - April 2023

- Creation of APIs for the TechPros Web Application, an EdTech platform offering courses where professionals can register, purchase courses, and enroll
- Enhanced team productivity by 30% by leveraging modern CI/CD platforms and tools, thereby eliminating manual deployment to end users
- Collaborate with cross-functional teams to design and implement RESTful APIs for seamless integration with frontend applications
- Implemented security measures, including data encryption and authentication mechanisms, to safeguard sensitive user information

PROJECTS

CVMS (Customs Verification Management System) Live | Tools: React, TypeScript, React Native, JavaScript

Built a comprehensive VIN verification platform enabling Users verify their vehicle through the web and Nigerian Customs officials to efficiently verify vehicle identification numbers through mobile interfaces.

Developed an intuitive React-based web frontend and React Native mobile enforcement app, streamlining the verification process and reducing manual errors for Nigerian Customs officers, giving users confidence on their vehicles.

Successfully launched the live system with cross-platform support, enhancing customs operations and verification accuracy in the field.

ExamsPrime [Live](#) **Tools: .NET, React.js, Javascript, PostgreSQL,**

Built all-in-one platform for students to prepare for exams with personalized study tools, mock exams, and progress tracking.

Developed the backend using ASP .NET Web API and a dynamic React.js frontend,tracking. delivering a smooth, engaging user experience.

Successfully launched the platform, resulting in a 20% increase in student engagement and retention.

KwabApp [Github](#) **Tools: .Net, MongoDB**

KwabApp revolutionizes digital payments by allowing users to complete transactions effortlessly through QR code scanning. It ensures fast, secure, and seamless payment processing. This solution enhances convenience for users and brings a modern touch to everyday transactions. This project was built with ASP .NET Web API for backend.

EDUCATION

University of Port Harcourt 2016 - 2020

BSc, Banking and Finance
